

Last Mile Health Theory of Change

Version: December 7, 2020

Last Mile Health Key Performance Indicators

Theory of Change Outcome	Key Performance Indicator
STRENGTHEN - Advise & advocate for strong community health systems	
Governments, philanthropic, and aid organizations fund efforts to supervise, salary, supply, and upskill community and frontline health workers	<p>Number of rural and remote community and frontline health workers receiving supervision, supplies, salary, skills, information systems, or digital tools in Last Mile Health-supported countries</p> <p>Number of people served by community health workers that are supervised, skilled, supplied, or salaried in partnership between a Ministry and Last Mile Health</p> <p>Total number of malaria, diarrhea, and acute respiratory infection treatments delivered annually by community health workers for children under 5 years in Liberia</p> <p>Community health system funding availability in Last Mile Health operating countries</p>
Government health officials design and implement high impact, data-driven, community health systems with strong governance	<p>Percentage of community health workers receiving the electronic community health information system roll out in Malawi</p> <p>Percentage of community health workers receiving correct, on-time payment in Liberia</p> <p>Percentage of community health workers receiving two or more CHSS supervision visits in the last four weeks</p> <p>Percentage of community health workers with all life-saving commodities in stock</p>
UPSKILL - Train & grow the community health workforce	
Community and frontline health workers acquire and apply new knowledge and skills in primary care delivery	<p>Number of rural and remote community and frontline health workers trained and assessed</p>
Health leaders acquire and apply expertise to manage community health systems	<p>Number of learners who have ever accessed course content for health systems leaders</p> <p>Number of learners who have completed and/or earned a certificate for health systems leadership courses</p> <p>Number of guided journey learners who apply health systems leadership concepts within their work or study</p>
DELIVER - Demonstrate effective community-based primary care	
All patients equitably access and trust community-based primary care provided by community and frontline health workers	<p>Number of treatments delivered for children under five by community health workers in Last Mile Health managed areas of Liberia (Grand Bassa, Grand Gedeh, and Rivercess counties)</p> <p>Percentage of treatments conducted by a formal provider in Last Mile Health managed areas of Liberia (Grand Bassa, Grand Gedeh, and Rivercess counties)</p> <p>Percentage of women using modern family planning in Last Mile Health managed areas of Liberia (Grand Bassa, Grand Gedeh, and Rivercess counties)</p> <p>Percentage of children age 12-23 months receiving full course of pentavalent immunizations in Rivercess County, Liberia</p>
